

# CROMAR VENT 3 PRO BREATHABLE MEMBRANE

The Vent 3 Pro Professional Breathable Membrane by Cromar is a durable underlay for Roofing & Wall systems. It provides excellent weather protection with ventilation and is suitable for both cold and warm applications.

-  SUITABLE FOR USE ON BOTH ROOFING AND CLADDING SYSTEMS
-  ULTRA-HIGH PERMEABILITY FOR MOISTURE AND VAPOUR
-  SUITABLE FOR BOTH COLD AND WARM APPLICATIONS

## PANEL SPECIFICATIONS

Weight	8.27kg
Thickness	165gsm
Length	50 meters
Width	1 meter
Colour	Pale Green Top Face White Under Face

Ultra-High  
Permeability

Durable  
3-Layered  
Design

Suitable For  
Multiple  
Applications

### MATERIALS

Made from flexible polypropylene layers bonded around a micro-porous polypropylene film.

### VERSATILE

Designed for use with unsupported or fully supported slated, tiled, or metal Roofing and Cladding systems.

### ACCESSORIES

Rooflights, fixings, trims, and flashings complete the system, offering a robust and cost-effective sheet cladding solution.

### PERMEABLE

Features ultra-high permeability for moisture and vapour while maintaining superior water resistance.

### LONG-LASTING

This Breathable Membrane is BBA-certified and designed to last the full lifespan of the project.

**Please Note:** When used in Roofing applications, construction can be safely undertaken at a pitch as low as 4 degrees using conventional through-sheet self-drilling fasteners in the lower part of the profile.
