

Foam Fillers

To fit 13/3 Corrugated Profile

A polyurethane Foam Filler designed to close off the end of our 13/3 Corrugated Sheets, preventing the weather from getting in when you need it most.

Due to the shape of our Corrugated Sheets, a Foam Filler fits between the final Purlin of your building and the Roofing Sheets. It can also be incorporated at the other end of the Sheet between this and the Flashing used to seal off the roof.

Corrugated Profile Foam Fillers

Foam Fillers can be held in place with silicone sealant, if necessary, to give your roof the finish it needs. Measuring one-metre in length and made from polyurethane, our 13/3 Corrugated Foam Fillers will ensure protection to your finished project.

SPECIFICATIONS	
Material	Polyurethane foam
Fits	13/3 Corrugated
Base	6mm
Length	1 metre
Sold	Single

PLEASE NOTE - We advise using the correct type of glove (with level 5 cut resistance) when handling or moving steel Sheets and Flashings. Extra care should always be taken when working with metal products.
