

Installation

Mastic Lapping Tape 30m

Supplied in a 30-metre roll for ease of application, Mastic Lapping Tape creates a seal between side laps, end laps and Flashings to secure your Sheets.

Our butyl Mastic Lapping Tape is pressure-sensitive and highly adhesive. Ensure the correct placement of metal Sheets before using Mastic Tape to allow for repositioning, where required.

Apply Mastic Lapping Tape across the width of your Sheets, allowing for a minimum end overlap of 250mm. We advise to leave a 25mm gap along the top and bottom of the Sheeting when applying Mastic Lapping Tape.

Benefits of Mastic Lapping Tape

- Strong sheet-to-sheet adhesion
- Creates a rain and weather-resistant seal when applied across the length of the Roofing Sheets
- More effective seal when compared to silicone

SPECIFICATIONS	
Width	9mm
Height	1.5mm
Length	30 metres

PLEASE NOTE - We advise using the correct type of glove (with level 5 cut resistance) when handling or moving steel Sheets and Flashings. Extra care should always be taken when working with metal products.
