

# Abutment Flashings

## PVC Plastisol 3m

Cladco 3m Abutment Flashings are manufactured from high-quality, galvanised steel. These Flashings are coated with PVC Plastisol for a damage and scratch-resistant, leather grain finish.

Abutment Flashings are made with a 110-degree internal angle. They are designed to flex 10-15 degrees either way to create a neat finish for a profiled roof or a clad building.

### Cladco Abutment Flashings

Steel Abutment Flashings are manufactured with a 10mm safety welt. This improves the strength of the Flashing while increasing your roof's aesthetics.

Abutment Flashings can be secured to roofing sheets using 22mm Stitching Screws. Please allow for a 200mm overlap to the proceeding Abutment Flashing when fixing.

Please note: 200mm x 200mm Flashings provide a coverage of 190mm x 190mm due to the 10mm safety welt.

SPECIFICATIONS	
Length	3 metres
Sizes available	200mm x 200mm
