

POWDER COATED ALUMINIUM POST BALUSTRADE SYSTEM

Cladco balustrade posts provide stability for balustrade handrail sections, helping to support and increase safety. Posts are manufactured from high-quality aluminium and are powder-coated for durability. Posts come with foot and top caps to create a seamless, professional finish.

LIGHTWEIGHT AND EASY
TO INSTALL

Low Maintenance

Easy To Install

Durable Powder
Coating, Ready To
Paint

Superior Strength
And Durability

MATERIALS

The aluminium balustrade post is crafted from extruded and welded aluminium sections, ensuring exceptional strength and durability.

SURFACES

Clean and smooth finish with a post cap and foot cap included to complete your installation.

ACCESSORIES

Handrail posts work with balustrade handrails, gates, and stair sections to create a secure, customisable system that suits any decking or outdoor space.

LOW MAINTENANCE

Balustrade handrail posts are very low-maintenance thanks to the welding and extruding of aluminium sections during their manufacture.

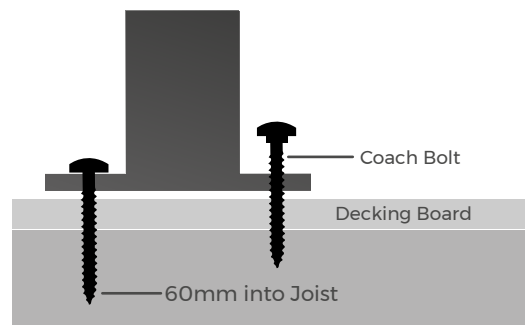

LONG LASTING

The material makes these posts a long lasting addition to your balustrade system.

INSTALLATION ADVICE

Start by marking out the positions of each post on your decking area. Once marked and double-checked, pre-drill 8mm pilot holes for the posts. Install the first post, ensuring it is level, and securely fix it into the existing pilot holes. It is recommended you use a coach bolt, inserted to a minimum depth of 60mm into the post for a secure fit.

The fixings will be concealed by the post foot caps, which can be placed over the top to hide them. The post cap simply slots onto the top of the post. Once in place, secure the cap by screwing it into the post using either a black-coated screw or a screw painted to match the balustrade.
