

2.2M CORNER TRIM ALUMINIUM DECKING

Complete your aluminium decking installation with the 2.2m Aluminium Corner Trim – the ideal finishing touch for a smart, professional result. Designed to neatly conceal exposed corners and edges, these trims also provide enhanced structural strength and visual consistency across your project.

Manufactured with a high-quality finish and available in the same four colours as our Aluminium Decking Boards, including Plain Anodised Aluminium, these trims allow for a seamless, colour-matched installation.

INSTALLATION ADVICE

Finishing your aluminium decking project is simple with Cladco aluminium corner Trims. Available in matching colours to our aluminium decking boards, these trims are designed to conceal exposed edges and deliver a neat, professional finish.

Trims can be measured and cut to size using a circular saw or mitre saw fitted with a suitable blade for cutting aluminium. Secure trims to your decking using suitable length screws for a strong and reliable installation.

For full installation guidance, please refer to our online installation guide.
