

# HOLLOW COMPOSITE END CAPS

## SIGNATURE RANGE

Cladco hollow decking end caps are used to seal off the ends of Cladco Signature hollow core composite decking boards to give your decking a professional finished look. Please note that these end caps are not a universal cap and are designed only to fit Cladco Signature hollow composite decking boards.

## INSTALLATION ADVICE

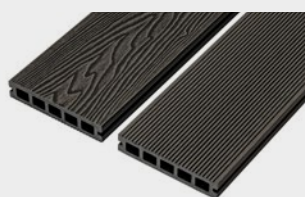

Once the Signature boards have been positioned and installed, end caps can be used to complete the decking.

It is recommended to lightly sand the edge of both the edge of the board and the end cap to create sufficient friction. This will make the caps more secure once slotted in place.

For increased security, Cladco adhesive can be used. This will help to fix the caps more solidly in the edges of the boards.
