Thickness	10mm
Weight	4kg

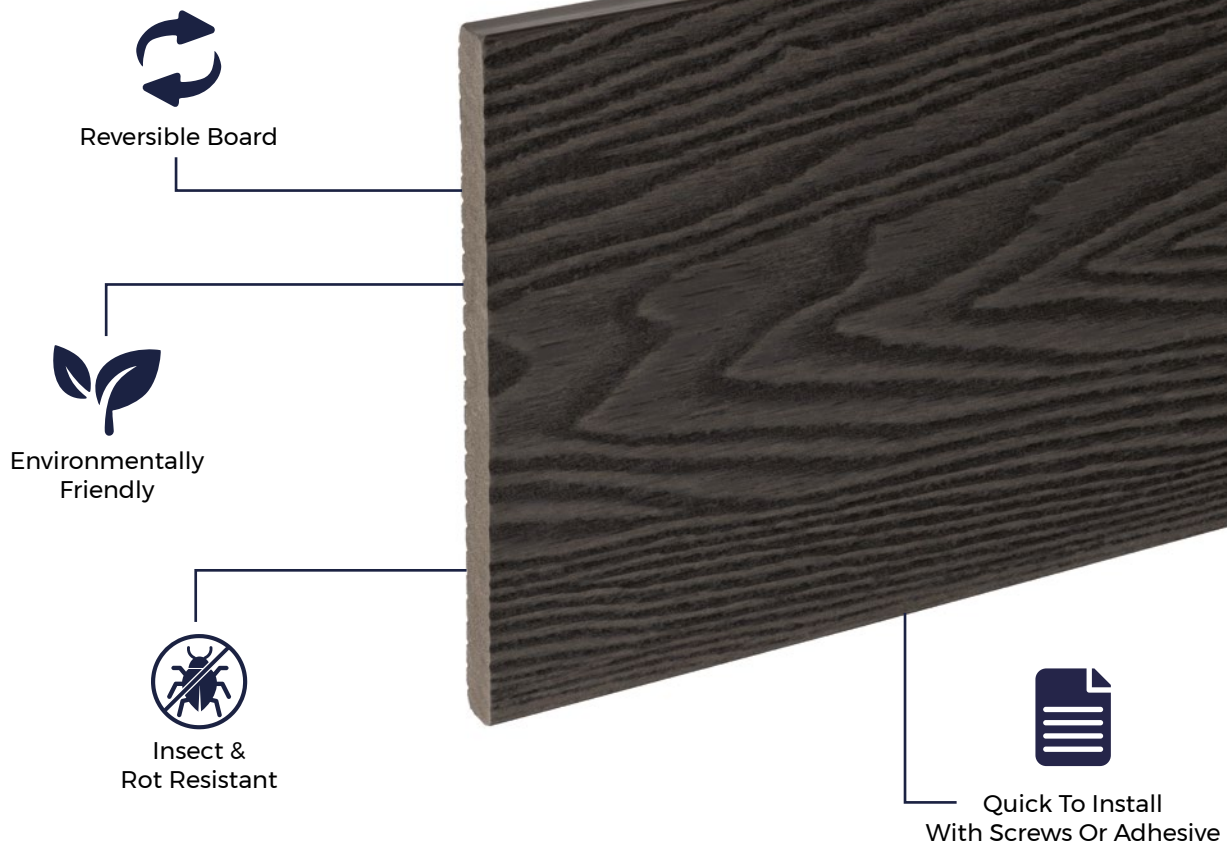

TEST CERTIFICATIONS

FSC® Certification

SA-COC-005542

Please note: Images are for illustration purposes only. Actual products may vary slightly from those shown.

MATERIALS

Composite wood-plastic mix comprising 60% hardwood fibres, 40% recycled plastics.

SURFACE

Choice of either a woodgrain effect or narrow grooves for your outdoor space.

ACCESSORIES

Composite fascia boards can be installed with 50mm SPEEDDEKZ screws or Cladco adhesive.

LOW MAINTENANCE

Unlike timber, Cladco composite fascia boards do not need to be sealed, stained or varnished.

LONG LASTING

Cladco composite fascia boards are a long lasting addition to your decking project.

RECYCLED MATERIALS

Cladco Signature composite fascia boards are manufactured using 100% recycled materials, reducing our impact on the environment. A mix of 60% recycled hardwood fibres and 40% recycled, post-consumer plastics provides each Board with low-maintenance and long-lasting benefits.

All Cladco composite products are available as FSC® certified for the same cost. If you require FSC® certified products, please ask for these when placing your order.

AFTERCARE

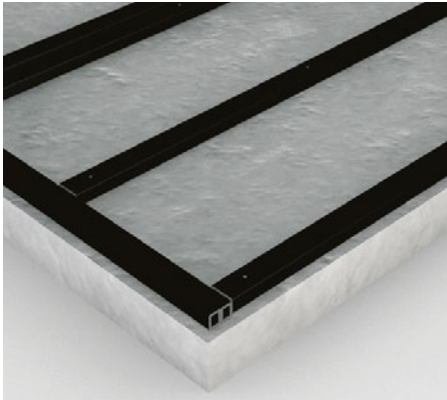

As a composite material, these Signature composite fascia boards will naturally accumulate dirt when exposed to outdoor conditions. For everyday debris such as plants, leaves, berries, or animal droppings, simply brush your boards with a broom and warm, soapy water.

In cases of more stubborn dirt or grime, Cladco ultimate composite decking cleaner can be applied. this fast-acting foaming formula is an effective way to maintain your decking. If stains persist, pressure washin may be necessary to restore the decking appearance.

INSTALLATION ADVICE

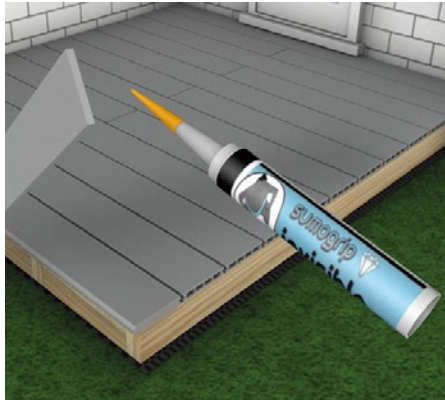

Screws

These fascia boards can be fixed to your Signature composite decking or joists using 50mm SPEEDDEKZ deck screws. The screws need to be inserted 13mm away from the edge of your fascia board.

Adhesive

Cladco adhesive can be used to secure Signature fascia boards to the decking structure. It is recommended to use this sealant gun for a more controlled application.

Screws and Adhesive

For the best results, use a combination of screws and adhesive for a superior finish. To do so, alternate between adhesive and screws every 150mm.

NATURAL WEATHERING

As Cladco Signature composite fascia boards contain natural wood elements, they will fade from weathering over time.

This process is most noticeable within the first six months after installation.

Please be aware that the appearance of composite boards will change depending on weather conditions and, when wet, boards will display a different tone compared to when they are dry.

For detailed information about installation, please read our Signature composite decking installation guide.
