

2.5M CAPPED COMPOSITE CORNER TRIM PRORANGE

Cladco capped composite corner trims provide the ideal finishing touch for your ProDeck or ProClad installation. These trims deliver a professional, polished look by neatly concealing exposed edges and protecting corners from debris and weather, ensuring a clean and durable finish for your project.

Important Note: The **onyx, pewter, platinum and sandstone** colours are currently only available in **2.2m length**, not 2.5m. This is a temporary stock change and will be updated once 2.5m stock is available again.

MATERIALS

Composite core crafted from 100% recycled materials, featuring a durable capped finish for enhanced protection and longevity.

SURFACES

The capped polymer protective surfaces deliver exceptional durability, offering enhanced resistance to stains and mould.

ACCESSORIES

Capped composite corner trims can be easily and securely fixed in place using CTI adhesive, ensuring a strong and lasting installation.

LOW MAINTENANCE

Thanks to the polymer capping, these trims require no sealing, staining, or varnishing, providing a hassle-free, low-maintenance finish.

LONG-LASTING

Cladco capped composite corner trims offer a durable, long-lasting finish for your ProDeck or ProClad project, ensuring a professional and polished appearance.

RECYCLED MATERIALS

Cladco capped composite corner trims feature a core made from 100% recycled materials, comprising 60% recycled hardwood fibres and 40% recycled post-consumer plastics, helping to reduce environmental impact.

Our ProRange trims combine this composite core with a durable polymer protective shell, enhancing resistance to weathering, scratching, staining, and UV fading for superior longevity.

All Cladco composite products are available as FSC® Certified at no additional cost. If you require FSC® Certified products, please request them when placing your order.

AFTERCARE

Cladco capped composite corner trims may accumulate dirt over time due to outdoor exposure. For everyday debris such as leaves, berries, or animal droppings, simply brush off with a broom.

For more stubborn dirt or grime, clean with warm soapy water to restore the trim's appearance.

INSTALLATION ADVICE

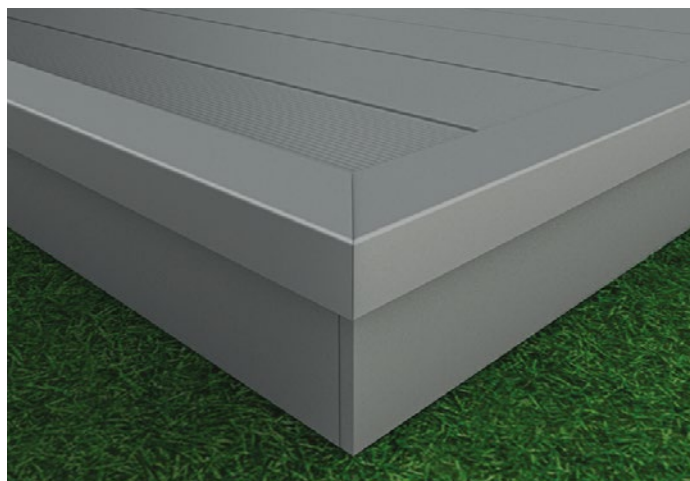

Cladding Installation

Corner trims can be cut to size or joined together as needed. Secure them to your ProClad woodgrain composite wall cladding using Cladco high strength adhesive. Apply the adhesive either to both sides for a firm fix or only to the top edge to allow for natural expansion.

Decking Installation

If joining two trims, use Cladco high strength adhesive on either both sides for a strong bond or just one side to permit expansion. Repeat this process until the entire area is finished.

TEMPERATURE EXPANSION

The capped polymer shell of the composite core reduces the trims' susceptibility to temperature fluctuations, making them highly resistant to expansion and contraction caused by heat and cold. This stability ensures a durable and reliable finish.

Additionally, the polymer shell offers enhanced protection against weathering and improves insulation, helping to regulate indoor temperatures and potentially reduce heating and cooling costs.

For detailed installation instructions, please refer to our ProClad composite and ProDeck composite installation guides.
