

PURLIN SLEEVE CONNECTOR

PURLINS

For a more secure and stable Z Purlin installation, Cladco Sleeve Connectors are designed to support joints within the purlin system. These sleeves help create a continuous, reinforced substructure, providing a strong and reliable base for your roofing or cladding sheets.

MATERIALS

The sleeves are manufactured from high-strength galvanised steel to ensure that potential rusting and corrosion is minimal.

SURFACES

No additional finishes are required thanks to the high-strength S450 steel construction.

ACCESSORIES

The purlin sleeves can be installed with our Z purlins and sleeves to enhance the strength and stability of the roofing structure.

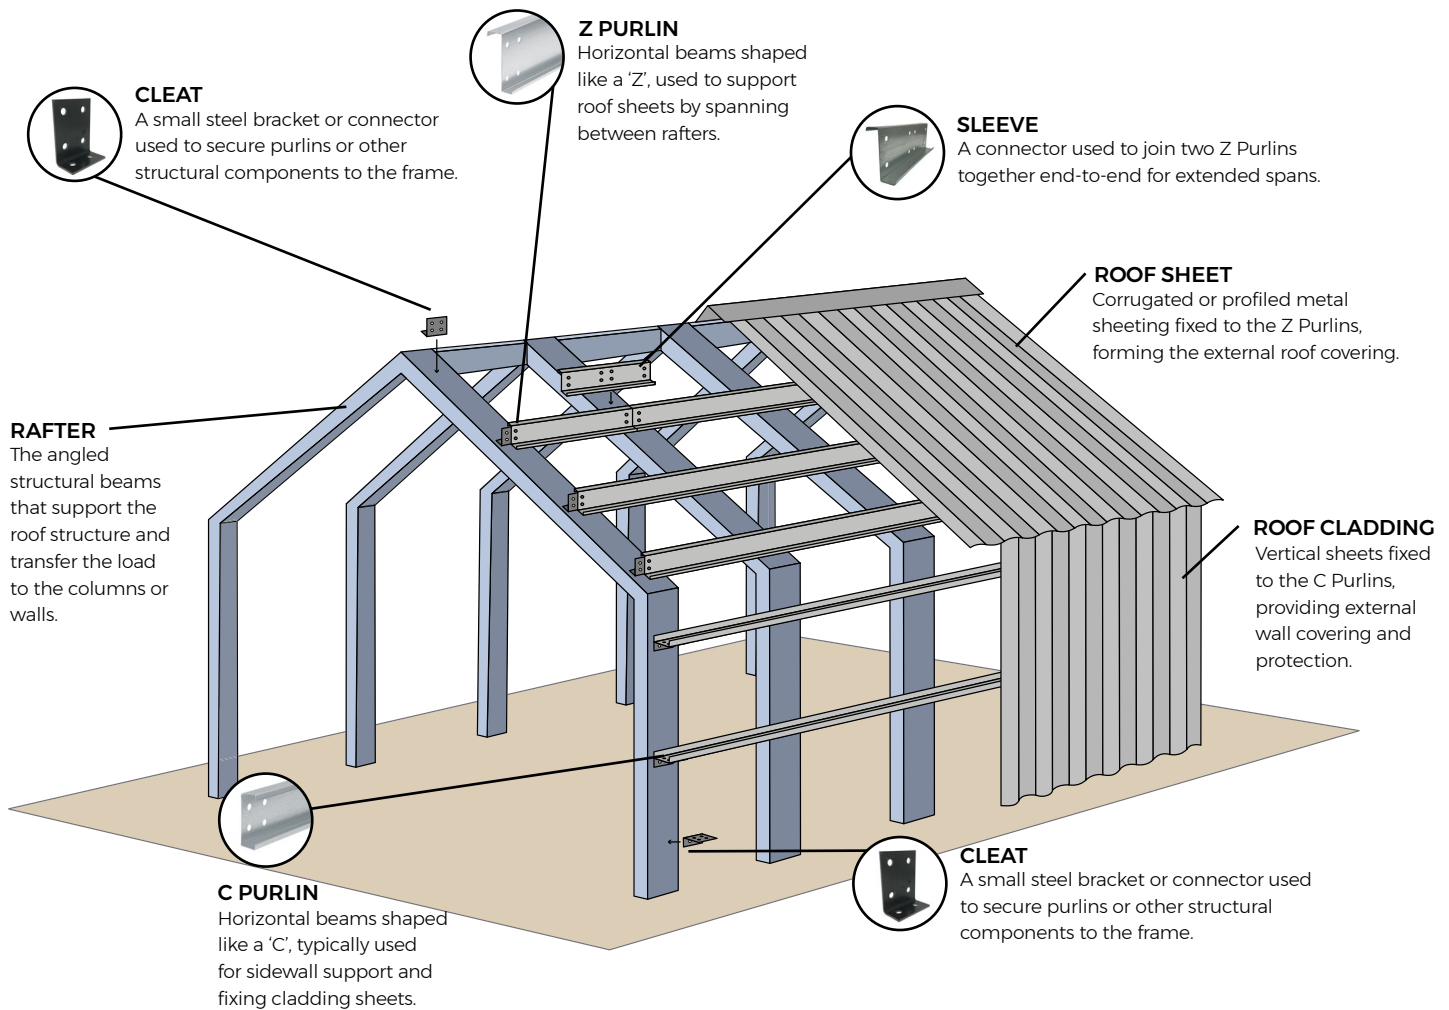

INSTALLATION

Please speak to your builder or contractor for installation advice specific to your project

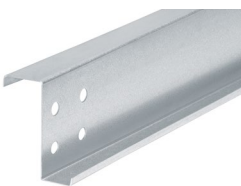

LONG-LASTING

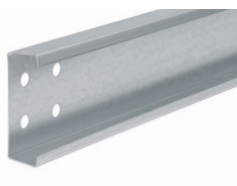

The cleats help provide a durable and strong base structure, ensuring lasting support for your roofing project.
